

- Currently, 86 countries are developing Integrated National Financing Frameworks (INFFs) essential to achieve the 2030 Goals.
- 13 national and subnational governments have an operational financing strategy, and 50+ countries are implementing reforms through their INFF.
- Countries are implementing 140+ reforms to mobilise and align public and private financing with all dimensions of sustainability, including gender equality, climate and social sector priorities.
- INFFs will be an important platform for financing the 3rd round of Nationally Determined Contributions (NDCs) due to be published at COP30 in 2025

INFF emerging impacts

Analysis of reforms in 17 countries using INFFs:

\$16 billion
in new finance
leveraged for SDG
investment

\$32 billion
SDG-alignment and
scope for alignment

Colombia: \$10bn

Increase in SDG-aligned budget expenditure

Mongolia: \$3bn+

Market capitalisation of firms covered by sustainability reporting guidance

Tanzania: \$66m

Corporate green and social bond issuances

Opportunities moving forward

- Develop INFF Financing Strategies
- Implement key policy reforms for more sustainable, inclusive public and private finance
- Improve public expenditure by increasing reach to vulnerable populations and addressing climate mitigation and adaptation
- Engagement with private investors interested in SDGs

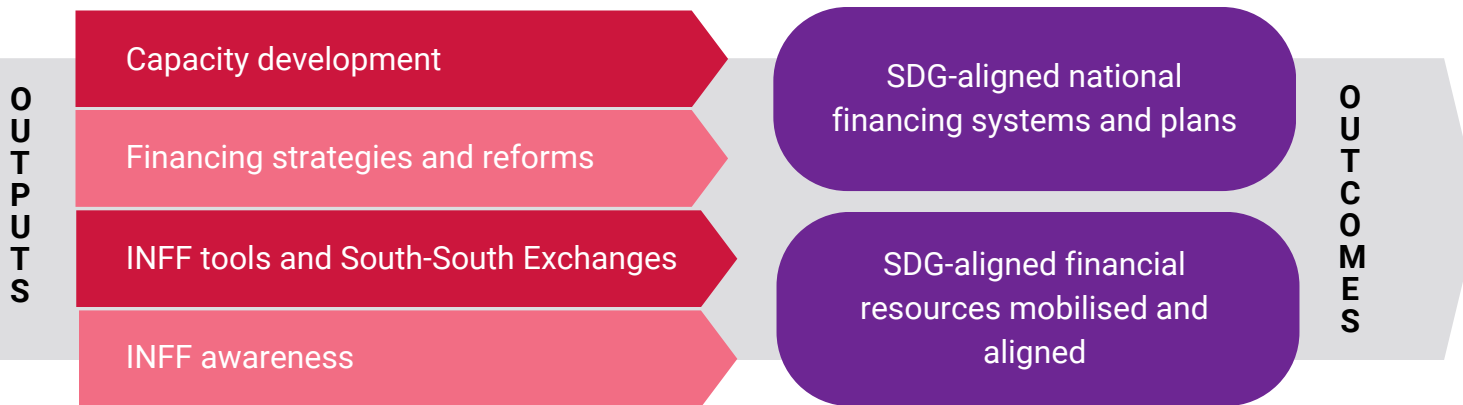

What does the INFF Facility do?

The Facility responds to country demand – brokering technical assistance, facilitating knowledge exchange and providing access to technical guidance – helping realise the potential of INFFs to accelerate progress towards the SDGs. The INFF Facility is currently supporting one-third of the countries developing INFFs with high demand from many other countries.

INFF Facility Theory of Change

INFF Facility results to date

Partnerships

A wide range of partners are supporting countries to develop INFFs. The Facility is welcoming new partners to enhance coordination and collaboration in support of country-led INFFs.
