The Facility responds to country demand – brokering technical assistance, facilitating knowledge exchange and providing access to technical guidance – helping realise the potential of INFFs to accelerate progress towards the SDGs.

The INFF Facility is currently supporting one-third of the countries developing INFFs with high demand from many other countries.

**Opportunities moving forward**

- Develop INFF Financing Strategies
- Implement key policy reforms for more sustainable, inclusive public and private finance
- Improve public expenditure by increasing reach to vulnerable populations and addressing climate mitigation and adaptation
- Engagement with private investors interested in SDGs

**What does the INFF Facility do?**

The Facility responds to country demand – brokering technical assistance, facilitating knowledge exchange and providing access to technical guidance – helping realise the potential of INFFs to accelerate progress towards the SDGs. The INFF Facility is currently supporting one-third of the countries developing INFFs with high demand from many other countries.
